Projects

Reance – Freelance Marketplace

- Developing a full-stack freelance marketplace connecting clients and freelancers.
- Designed REST APIs, authentication, database models, and backend services using Express.js and PostgreSQL.
- Built responsive user dashboards and project workflows with Next.js and TypeScript.

Craft

- Built Craft, an open-source TypeScript CLI tool that automates project scaffolding for Next.js, Vite, and Express.
- Implemented configurable project generation with TypeScript/JavaScript, PostgreSQL/MongoDB, authentication options, and development tooling.
- Published @igmoni/craft on npm, enabling developers to generate projects through a globally installable CLI.

BALC Educational Website

- Designed and developed a responsive multi-page educational website using Next.js and React.js.
- Improved website performance through component-based architecture and optimization techniques.
- Delivered a modern and user-friendly experience for students and institute visitors.

Samye Tibetan Traditional Medical Treatment Centre

- Developed and deployed a production-ready healthcare website for a Tibetan medical treatment centre serving patients across India.
- Built responsive UI, appointment booking workflow, and modular reusable components using Next.js and React.
- Collaborated directly with the client to translate business requirements into a modern healthcare website. The site includes clinical services, appointment booking, and multiple clinic locations.
